

**FW compatibility to systems and CU/CCU**

This table shows the FW releases, which can be used in each system and in each CU/CCU model used in the system

	System							
	MXC (Note 1)			DCS 6000 (Note 2)			DDS 5900	
	Central Control Unit			Central Control Unit			Central Control Unit	
	DIS-CCU	CU61xx	CU60xx	DIS-CCU	CU61xx	CU60xx	DIS-CCU	CU5905
FW Release 9.0.2							Note 3	
FW Release 8.6.0								
FW Release 8.0.5								
FW Release 7.5.10								
FW Release 7.4.4								

**FW version recommended to use**  
**FW is compatible, but update is recommended**  
**FW is not compatible**

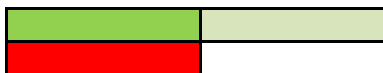

- Note 1**      MXC systems may include DCS 6000 units and from FW Release 9.0 also DDS 5900 units
- Note 2**      The table is valid for systems consisting of only DCS 6000 units
- Note 3**      5900 units can now coexist with MXC and DCS6000 units and also work with SW6000

**FW compatibility to CU/CCU and SW6000**

This table shows the FW releases, which can be used in each CU/CCU model and shows the latest SW6000 version compatible to a FW release

CU/CCU	FW release																		
	9.0.2	8.6.0	8.0.5	7.5.10	←	7.3	←	7.1.0	←	6.0.3	←	5.3.7	←	5.3.4	←	4.5.3			
DIS-CCU	SW v9.0.13*																		
CU 5905		No SW6000 support																	
CU 6110		SW v6.10.14*		SW v5.8.122*															
CU 6105																			
CU 6011-C			SW v6.3.34.26*																
CU 6005-C																			
CU 6011																			
CU 6005																			
CU 6010																			

\* The last SW6000 version compatible to a FW release

FW release supported in the CU/CCU  
 FW release not supported in the CU/CCU

**SW6000 licence compatibility**

The table above shows the SW6000 license version needed in SW6000

License v1.7  
 License v1.6 or earlier

Update of SW6000 from v5.8.122 or an earlier version requires a new SW6000 v1.7 license

**FW license (CU/CCU license) compatibility**

Any created FW license (DCS license) is valid in a DIS-CCU
